

In RSA Archer®'s automated world, gathering questionnaires and assessment responses from external users continues to be a partially manual process at best, resulting in significant overheads and inefficient use of your valuable resources.

# Questionnaire++

+1 (925) 967-4451   info@vorsutus.com   www.vorsutus.com

## Business Process Overview

Customers seeking questionnaire responses from external responders such as third parties have limited options: (a) setup costly and robust hardware for a dedicated external instance, (b) develop expensive custom code to build static forms, (c) use direct mapping / single instance potentially compromising security by giving direct access, or (d) leverage reverse proxy and bear the licensing cost for external users accessing internal archer instance.

## Questionnaire++

Questionnaire++ is our custom solution that allows any Archer Questionnaire to be sent directly to any user inside or outside your organization using their email address. They do not need to have an RSA Archer® account, or access to your Archer instance to respond. All they need is an internet connection (even a PC is optional – they can respond to simple questionnaires right from their mobile devices!).

## Questionnaire++ Process Flow

## Key Benefits and Features

**Cost Effective** – a fraction of the cost of maintaining custom code and/or robust hardware

**RSA Archer® Compatible** – Leverage full feature set of RSA Archer® to fully customize questionnaire workflow and your business process

**Flexible Questionnaire Format** – Add or remove questions as often as you like – just plan for outstanding responses when modifying a questionnaire

**Automatically Import Attachments** – Directly capture required documentation from responders to your RSA Archer® questionnaire

**End to end automation** – Save precious time and money by fully automating the assessment process along with your customized business process within RSA Archer®

**Capture 'wet' signatures** – Gather electronic signature from responders on completed assessments from within RSA Archer® with our SignArcher product
