RSA Archer® has changed the way organizations work beyond recognition through its sophisticated customizable workflow features. However capturing traditional 'wet' signatures is an area that has been beyond its reach, at least till now!

Business Process Overview

Since time immemorial, our legal documents, NDAs, engagement forms, authorization forms and the like have been using handwritten signatures. However the traditional paper-based world is finally taking a back seat to the digital world.

For organizations seeking to embed e-Sign capabilities in any part of their RSA Archer® business processes, SignArcher is an easy way to facilitate electronic exchange of contracts, authorization forms and signed documents. With our proprietary solution, your team can now make gathering of signatures a simple and efficient process.

Approvals & Signature Capture Transformation

- Gathering executive level approvals without need for execs to log into RSA Archer®
- Questionnaire responders attesting to their responses
- Fully automated RSA Archer® workflows around exchange of legal documents such as:
 - Contract / NDA signatures
 - Policy Attestations
 - Remediation Plan approvals
 - Exception Request approvals

SignArcher Process Flow
